So how did you save the Google Earth fly-in? ☺

Brian,

I had to create this on iMovie because Premiere Pro is currently not working properly on EPA servers, however I think the quality is still relatively high. I uploaded the file to GoogleDrive, and it can be downloaded here:

I also put it on the O drive under (O:)> Public > Baker\_Kirk > McAlester\_Radford Video

Now that I have all the files on our external hard drive, I can easily make any changes you'd like to the video—please let me know what you want fixed!

Best,

Nicole Kim
